

SPJ Proposal Form

The Science Partner Journals (SPJ) program is a partner program for journals from the American Association for the Advancement of Science (AAAS), the nonprofit publisher of the Science family of journals. The program features high-quality, online-only, Open Access publications produced in collaboration with international research institutions, foundations, funders, and societies. Through these collaborations, AAAS furthers its mission to communicate science broadly and for the benefit of all people by providing top-tier international research organizations with the technology, visibility, and publishing expertise that AAAS is uniquely positioned to offer as the world's largest general science membership society.

Organizations participating in the SPJ program are editorially independent and responsible for the content published in each journal. To oversee the publication process, each organization will provide professional editors committed to best practices in peer review and author service. It is the responsibility of the staff of each SPJ journal to establish and execute all aspects of the peer review process, including oversight of editorial policy, selection of papers, and editing of content.

This form is to help potential partner journals outline each journal idea and to provide a framework for conceptualizing a new title. Please return the form to spj@aaas.org.
